We sell the software for \$399. 9: A company called “Lesso” is offering an app called ClipStitch which can stitch together multiple photos and videos into a single image. The process can be automated, but also requires some creative editing. It’s possible to create the resulting clips yourself as well. 10: RICOH Imaging introduced a new 16 megapixel camera that can capture images and video at up to 60fps. While it’s nowhere near as small as the iPhone X, the RICOH THETA S can be held in a single hand and provides a decent up to 6x optical zoom. 11: Bonsai will launch new GEO front-facing and 360 VR cameras this year, plus GEO will start selling the less-powerful but better-performing GO app. 12: The Logitech C920 will be announced at CES 2019. The new webcam has a wide-angle lens, 10-bit HDR capture, and a headphone jack. It will be available for \$100. 13: The new USB Type-C-based Oculus Quest will launch in 2019, and will include a touch-pad controller and the software to run VR games on a powerful, standalone PC. 14: A new variant of the Nintendo Switch will launch this year. The machine will

be more powerful than the current Switch, but has a different design. It will be available for \$299. 15: HTC has announced that it will be launching a wireless VR headset for the consumer market. The U11 will feature 3DoF controllers, with the ability to track both your hands as well as your movement. The headset will work with the U11, U11+ and U11e smartphones. 16: Teleportation will finally make it to consumer devices, with the announcement of a pair of Beam smartglasses. These glasses can beam objects, images, video, and other information to and from a viewer wearing a pair. It sounds like a similar concept to what Google has been testing with a project called Lively. The devices will be available for \$1,000. 17: The Asus Zenfone 6 can now be pre-ordered in Singapore. The device will be available in black, white, red, and gold color options, and will ship in the 2nd quarter of 2019. 18: Google will introduce a new keyboard for the Pixel 4 phone that features a built-in laser 82157476af
